

FILTER PLATFORMS FOR GAS & ELECTRIC FURNACES AND AIR HANDLERS

Perfect Platform

Description

- The new Filter Platforms by GeneralAire® offer the most well-built, sleek designed and easiest to use galvanized sheet metal filter housings on the market, for residential and light commercial use.
- Space saving design for vertical installations, keeps furnace off floor allowing a cleaner, more professional installation. Eliminates the possibility of dust, pet hair, insects, rodents, water or sewer backup from entering the furnace.
- Allows furnace to work at maximum efficiency and extends life of furnace by providing even air flow distribution across bottom. Especially ideal for **High Efficiency Furnaces**, where side returns require more installation time, and are inefficient compared to a bottom return.
- Allows filter to work at maximum efficiency by eliminating need for transitions deflectors or turning vanes, thereby saving installation time and costs.
- Removes atmospheric and household dust, coal dust, insecticide dust, mites, pollen, mold spores, fungi, bacteria, viruses, pet dander, cooking smoke and grease, tobacco smoke particles, and more down to 0.3 micron (1/84,000 of an inch).
- Made to fit 1-3 ton or 3.5 ton electric air handlers or gas furnaces.
- Ideal for homes with allergy, asthma or respiratory sufferers, smokers, pets and mustiness.
- Helps protect and prolong the operating efficiency of the heating and cooling system.

Standard Features

- High efficiency MERV 10 Media Filter.
- Two, pull-out doors with handle allow filter access from either side.
- Adjustable inlet duct opening replaces need for field forming transition, significantly reducing installation time.
- Heavy 22 gauge galvanized sheet metal has been die cut for smooth edges, allowing for a smoother installation.
- Solid cabinet is riveted for sturdiness and long life.
- Individually boxed for convenient shipping and warehousing.
- Limited Lifetime Warranty.
